

FIELD REVISIONS (FRC/FRR)

WHEN DO FIELD REVISIONS OCCUR?

Field Revisions occur when changes need to be made to a permit after it has been approved and issued.

In the best case scenario, an applicant will apply for a field revision as soon as they know that there is a desire to change the plans. Other times, when an applicant has not notified the City that the plans have changed, and built something that diverges from what is shown on the approved plan set, the inspector will advise the applicant that an approved field revision is needed before the inspection can be approved.

APPLYING ONLINE

A field revision is applied for online via the applicant's [aca account](#), just like other types of permits. The type of permit will either be Commercial Field Revision or Residential Field Revision, listed under the Additional Services dropdown option.

▼ Additional Services

- Alternate Means and Methods Request
- Commercial Field Revision
- Residential Field Revision

▶ Permits

[Continue Application »](#)

Keep in mind that multifamily structures of 3 or more units are considered Commercial. If you are unsure about whether your permit qualifies as Commercial or Residential, refer to the permit number of the parent permit.

- BLDCNs and BLDCAs are Commercial.
- BLDRNs and BLDRAs are residential.

The application will ask for the typical site location information and contact information. It will also ask for the Related Record information. This should be the parent permit number (starting with BLD).

FEES

Processing of a deferred submittal is charged hourly, with a minimum of one hour of additional plan review: [Fee Schedule](#) (See Table 2 – Inspections for which no fee is specifically indicated)

The fee is due when the field revision is issued.

REVIEW PROCESS

The review process for a field revision depends largely on how many subject matter experts will need to review. A change in the truss system, for example, may only need to be re-reviewed by the building code reviewer. A change to the windows, could potentially trigger a re-review by Building, Land Use, and Historic.

After the plans are approved and issued it is important to keep a copy of the approved field revision plan set on site with the copy of the approved plan set of the parent permit. Final Inspection approval for the main permit will not occur until after all of the associated permits are also approved and inspected.
